

Technical Skills

Programming Languages: Python, JavaScript, Node.js

AI & Automation: AI Automation (n8n), AI Agents, Prompt Engineering, LLM Integration, AI APIs, Workflow Automation, RAG (Retrieval-Augmented Generation)

API & Integrations: RESTful APIs, API Integration, Webhooks, JSON, Postman

Tools & Collaboration: Git, GitHub, Notion, Slack

Backend & Databases: MongoDB, MySQL, WebSockets, Server-Sent Events (SSE)

Professional Skills: Problem Solving, Technical Documentation, Written Communication, Attention to Detail, Remote Collaboration, Independent Working

Experience

Torta, Remote (UAE)

Nov 2025 – Present

AI Automation Engineer (Contract)

- Designed and deployed AI-powered virtual receptionist solutions for healthcare clinics using n8n, automating patient communication and administrative workflows.
- Built AI voice and chat agents capable of handling appointment booking, rescheduling, cancellations, patient FAQs, and after-hours support.
- Developed AI automation workflows integrating LLMs, APIs, webhooks, and third-party healthcare systems to streamline clinic operations.
- Integrated AI assistants with clinic knowledge bases to provide accurate, context-aware responses and reduce front-desk workload.
- Automated notifications, lead management, and patient follow-up processes, improving operational efficiency and response times.
- Collaborated with cross-functional teams to deliver scalable AI automation solutions tailored to client requirements.

Projects

AI Receptionist | AI Healthcare Voice Assistant

Feb 2026 – Feb 2026

- Developed an AI-powered clinic appointment management system integrated with the clinic's existing PMS/EMR system, supporting UAE healthcare workflows.
- Built an AI receptionist that handled patient calls, answered common questions, and collected and validated patient information through natural voice conversations.
- Automated appointment booking, rescheduling, and cancellation by checking real-time availability through the PMS/EMR system.
- Implemented automated appointment confirmations and updates, reducing manual administrative work and scheduling errors.

Barbershops | AI Voice Assistant

Jan 2026 – Jan 2026

- Created a voice-based AI receptionist for barbershops that handles customer calls and assists with everyday booking requests.
- Designed conversational call flows using Vapi to understand customer needs, provide information about available services, prices, and business hours, and capture customer details.
- Set up an automated scheduling flow that finds suitable time slots and handles new bookings, appointment changes, and cancellations.
- Used Google Calendar for appointment scheduling and Google Sheets for maintaining customer information, booking history, and call records.

Education

COMSATS UNIVERSITY ISLAMABAD, VEHARI CAMPUS

Bachelor of Science in Software Engineering

Sep 2020 – June 2024

CGPA: 3.81/4.0
